Nicholas Center
*Built in 1993*
- Renovation of 26,000 square feet in the Nicholas Center
- A 20,000 square foot addition to the Nicholas Center

Bird Hall
*Built in 1966*
- Renovation of 37,350 square feet in Bird Hall

The Chester Campus of **John Tyler Community College** dates to the mid-1960s. Today, a comprehensive renovation and expansion project is critical for the College and the Community College Workforce Alliance (CCWA) to continue to meet student and community need. Together, John Tyler and CCWA serve four cities, 12 counties and more than 19,000 students annually.
Bird Hall and Nicholas Center
John Tyler Community College – Chester Campus

Primary project goals:

• Upgrade outdated science labs, enabling the College to provide vital training in the fields of science, technology, engineering, math and health (STEM-H). Currently, about one fifth of Tyler students are enrolled in STEM-H programs.

• Consolidate CCWA meeting spaces and offices in one building, answering community demand for more workforce training classrooms and public meeting spaces. Annually, approximately 4,500 students took workforce training courses through CCWA at Tyler’s Chester campus, and almost 900 meetings, job fairs and conferences were held through CCWA at the campus.

• Update information technology, mechanical, electrical and security systems.

The project also includes additional parking and site amenities funded with non-general funds.
