

ATI SIMULATION BROWSER SETTINGS ON A MAC

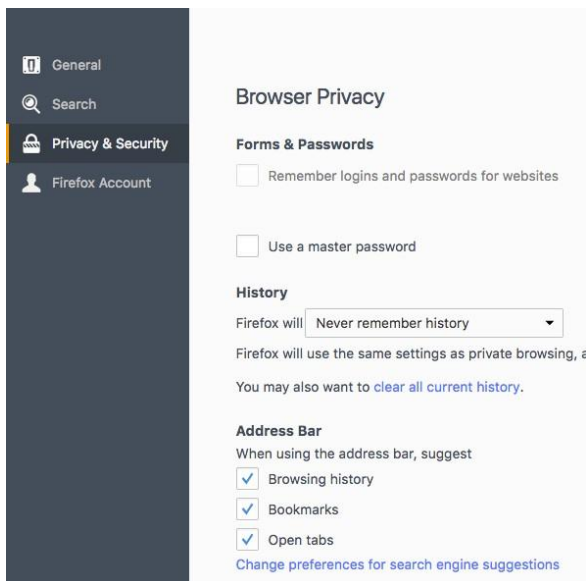

This document provides a brief guide to the steps for setting up your browser settings for optimal use of ATI simulation products on a Macintosh computer. ATI's recommended and most compatible browsers is Firefox

Firefox Setup

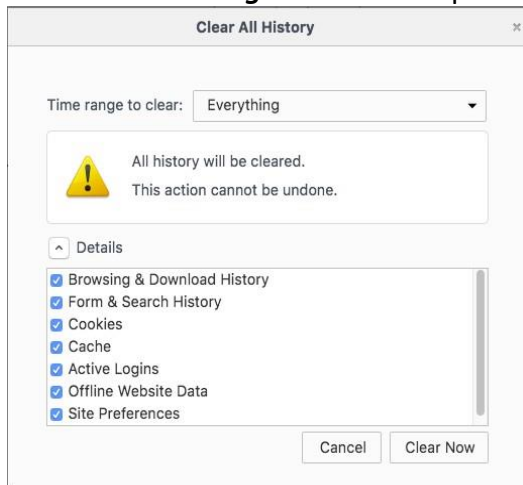

- 1) Open up Firefox Internet browser.
- 2) Navigate to www.atitesting.com.
- 3) Click on the Firefox menu item in the top left corner and then select Preferences

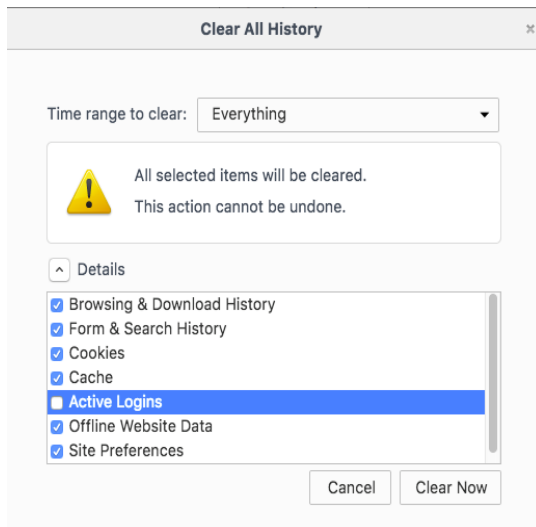

- 4) Choose the **"Privacy & Security"** tab, followed by the **"clear all current history"** link.

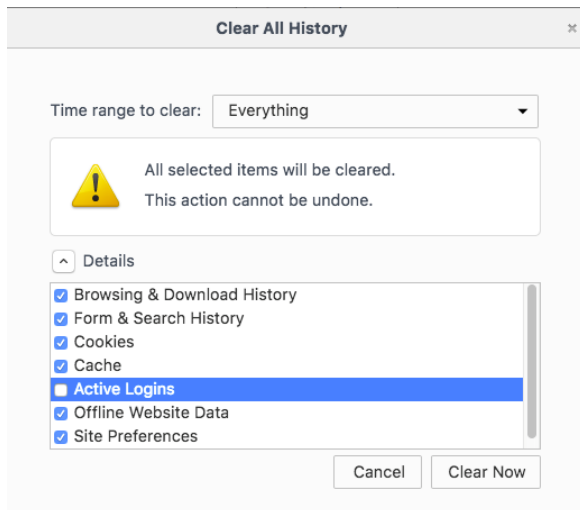

5) Use the **“Time range to clear”** dropdown and choose **“Everything.”**

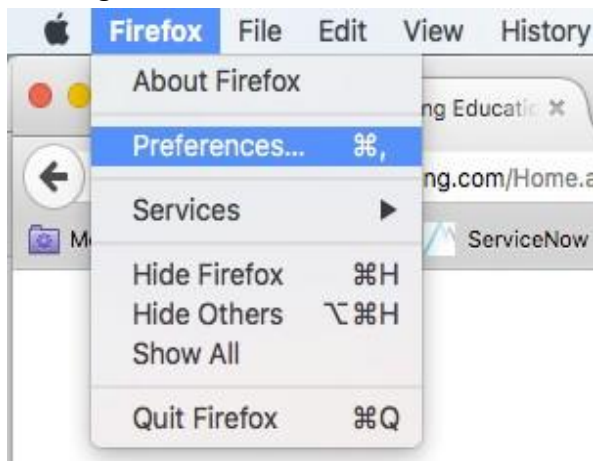

6) Check all boxes except **“Active Logins.”**

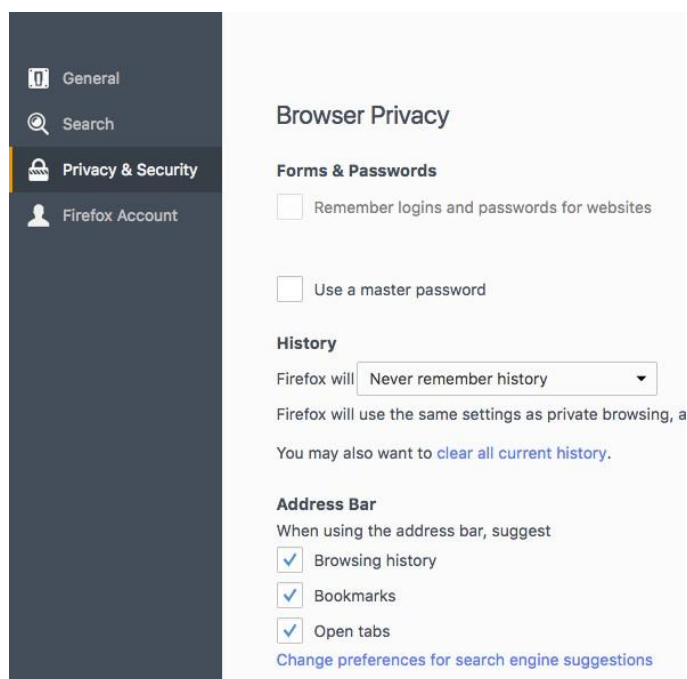

7) Choose the **“Clear Now”** button.

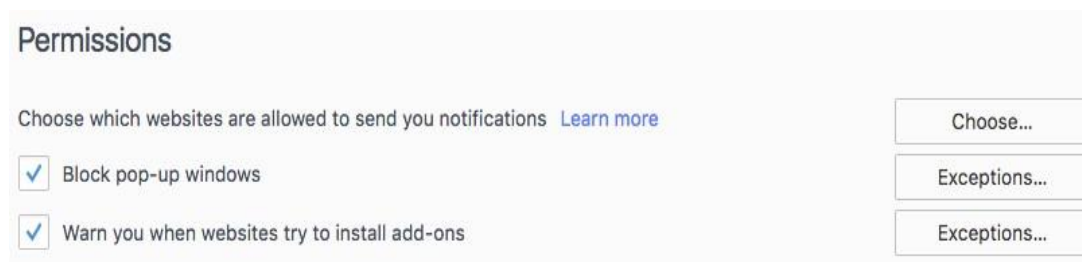

8) Once again, select the Firefox menu item in the top left corner and then select Preferences.

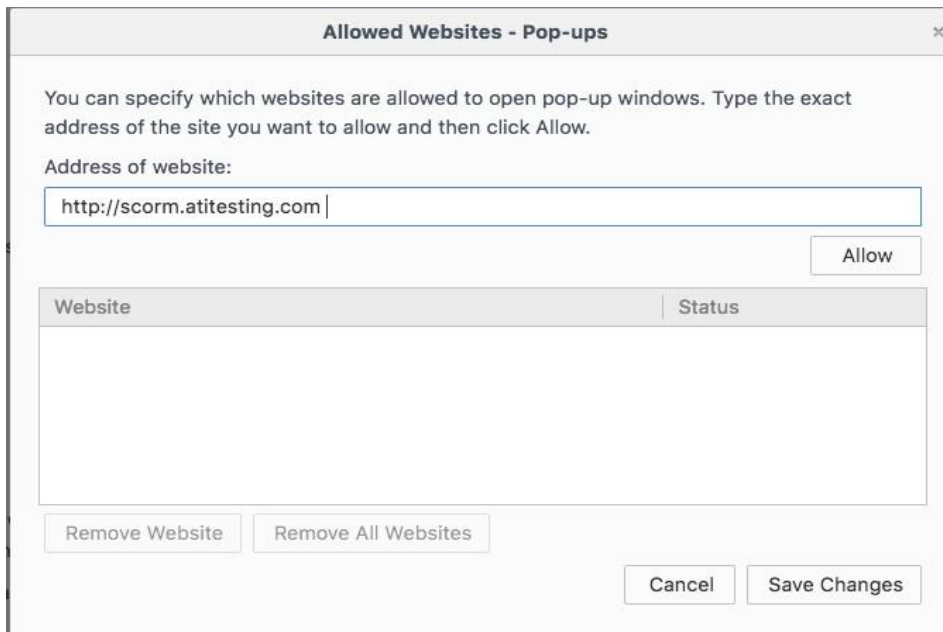

9) Choose the ***“Privacy & Security”*** tab.

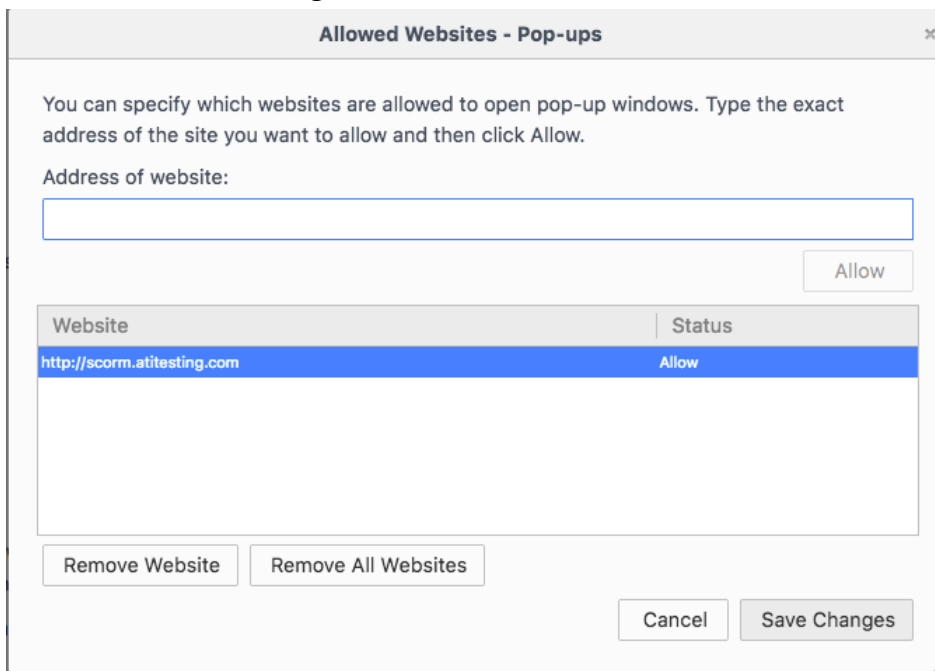

10) In the **“Permissions”** section, choose the **“Exceptions”** button to the right of the **“Block pop-up windows”** row.

11) Enter ***http://scorm.atitesting.com*** into the **“Address of website”** and choose the **“Allow”** button.

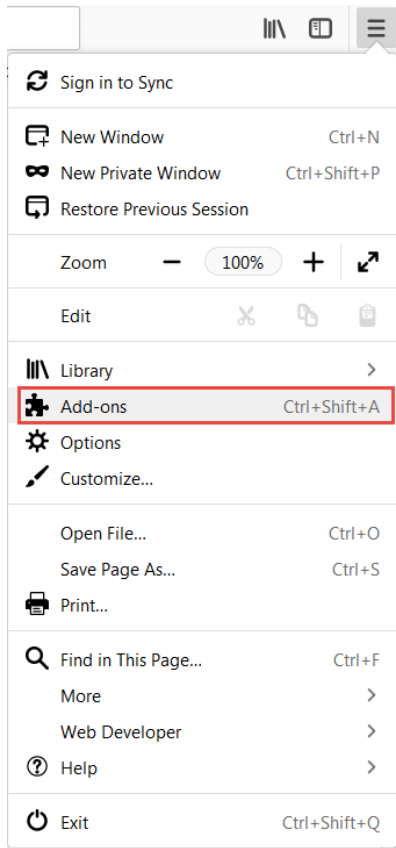

12) Choose the **“Save Changes”** button.

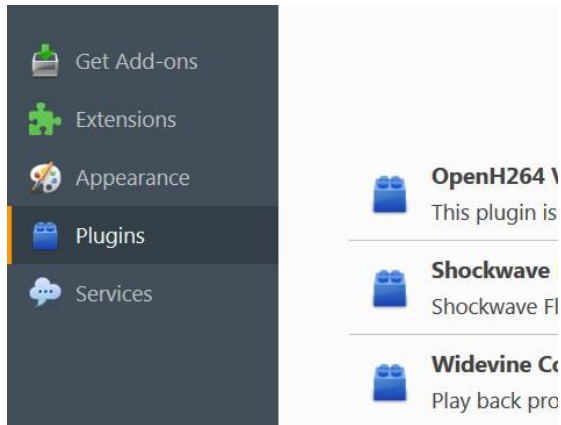

13) Open your toolbar menu at the far top right of your browser window.

14) Choose **“Add-ons.”**

15) Choose the “**Plugins**” tab.

16) In the “**Shockwave Flash**” section, choose “**Always Activate**” from the dropdown on the right.

17) Exit the Firefox browser, then re-open and return to www.atitesting.com
